DISCONNECTION TO TEMPORARY WATER

TENDER NO.	20-T05
WORK TO BE COMPLETED	DISCONNECTION TO TEMPORARY WATER

To Resident:

The Water is expected to be shut off on July 7th, 2020 at approximately 8:00 am as part of the construction project. Your house is being placed back to water being supplied by the new water system installed as part of this project and disconnecting you from the overland system.

The contractor will be going door to door to turn your water on, to the municipal system & disconnect your house from the temporary water system. If you will not be home during this time, please follow below instructions:

1. Close small valve situated on the "Y" adapter attached to your outside tap to point away from your outside tap (see diagram).
2. Close your outside garden tap by turning the tap clockwise.
3. Turn on your main waterline supply valve (usually located in the basement towards front of the house).
4. Open your cold water tap on your bathtub and let it run for 5 - 7 min.

Should you still not have water please call 1-888-599-3264 and a representative will walk you through the steps to turn your water on or they will come assist you if required.
