

Depot Services

The City of Cornwall is looking for feedback on the following depot services.

Use a dot sticker to indicate what you think!

Public and Open Space Recycling

I would use Recycling in Public Areas/Parks

I would not use Public Area or Parks Recycling

Currently in Cornwall there is no Public or Open Space Recycling Program. If implemented recycling bins would be placed in public areas such as arenas, pools, and meeting rooms, and would also be available in parks and recreation fields for use.

Household Hazardous Waste Depot

3 Times a Month- Seasonally April- November

Daily Monday-Saturday- Seasonally April-November

Currently in Cornwall the Household Hazardous Waste Depot is open 3 times a month, seasonally. Outside these dates the collection of hazardous waste is prohibited. This FREE service receives over 70 tonnes of hazardous waste per year and has over 5000 customers visit the depot per year.

Re-use Centre

I would visit the re-use centre and have items that I would take to it!

It is not something I would visit or have items for.

The City is looking to create a re-use centre, where gently used items can be taken. This centre would accept all types of items as long as they are still functional. The centre would then offer the gently used goods for free to any resident willing to take and use the items.
