

Notice of Study Commencement

Cornwall Brookdale Avenue from Seventh Street to Fourteenth Street

Municipal Class Environmental Assessment

The City of Cornwall is undertaking a Schedule 'C' Municipal Class Environmental Assessment (MCEA) for the improvements to Brookdale Avenue from Seventh Street West to Fourteenth Street West. These improvements are proposed to address the deteriorating condition of asphalt, improve safety, provide pedestrian and cycling facilities, accommodate increasing traffic volumes and plan for future modifications to the City's transportation system. (see Figure below).

The Municipal Class EA study will be completed in accordance with the Municipal Class Environmental Assessment process as a **Schedule C** activity. As a result, the City is carrying out Phase 1 (Identify the Problem or Opportunity), Phase 2 (Identify Alternative Solutions and Establish the Preferred Solution), Phase 3 (Identify and Evaluate Alternative Design Concepts) and Phase 4 (Environmental Study Report) of the MCEA planning process for this project.

During Phase 1 and 2, alternative solutions will be evaluated leading to a recommended solution to meet identified needs. During Phase 3, road design alternatives will be evaluated leading to a recommended design.

Consultation with the public, Indigenous Nations, regulatory agencies and stakeholders is a key component of the Class EA process, and we want to hear from you. Two (2) Public Information Centres (PIC) will be held during Phases 2 and 3. In addition interested participants will have the opportunity to review the Environmental Study Report (ESR).

To be added to the project contact mailing list or for further information on the project or the planning process being followed please contact our consultant or our Manager or visit:
