BUDGET PRESENTATIONS

BUDGET OVERVIEW

Mr. Cecil Vincent, Chief Administrator, provided Council with a Power Point presentation that provided Council members with the City of Cornwall's present financial pressures that render the 2002 Budget Deliberation process more difficult than previous years. Two specific areas noted were the non controllable expenditures and the lack of assessment growth.

Comparable values were provided that indicated that year over year, many changes are to be noted in the wages and benefits payed to its manpower. Combined budget constraints and the related impact of inflation, negotiated settlements, increased expenditures are all major contributions to our present situation.

Several options presented. Essentially, Mr. Vincent indicated that borrowing would only delay the tax requirement and would add to the final costs of services. Less than 40% of city services were adjustable and of this 40%, wages represent only 32% of the costs. In order to reduce expenditures by \$1 million, the City would have to reduce its staff level by 15%.

In continuing, Mr. Vincent stated that payroll costs would continue to impact budgets at a rate of at least 3+% as a tax rate impact yearly; assessment growth had averaged less than 1% as a tax rate impact over the last 10 years; other budget costs would be at least equal to inflation, more likely double of 3+%.

At this rate, some suggestions brought forward are to eliminate, reduce service levels in non-mandated services, ie: snow clearing, recreation, planning or transit; increase taxes annually; debt financing; assessment growth and/or all of the above.
